ENCLOSURES.

22nd. June, 1925.

Dear Sirs,

E. I am in receipt of your letter of the 17th instant, respecting the s.s. "NITEDAL", now under survey at your port with a view to classification, and forwarding for consideration, plans of the main boilers and pumping arrangements proposed for the vessel.

With reference thereto, I am directed to acquaint you that the scantlings of the main boilers meet the requirements of the Rules for a working pressure of 180 lb. with the exception of the thickness of the cylindrical shell plate, which owing to the low tensile strength of the material employed is very slightly below that required by the Rules, and the pumping arrangements are in order.

In the circumstances, the machinery of the vessel will be accepted for a working pressure of 180 lbs. per sq inch, and a notation of (LHC) (with date) without the distinguishing mark & assigned, provided -

1. The engines be opened out, examined and found satisfactory
2. The sizes of shafting be such as could be accepted.
3. The boilers be examined throughout and found in good and safe working condition.
4. The scantlings be as shown on the plan.
5. The pumping arrangement be as shown on the plan and otherwise in accordance with the requirements of the Rules.

W230-0175(1/2)

Lloyd's Register
Foundation

It is noted that a plan of the auxiliary boiler and
the sizes of the shafting will be submitted in due course.
The two plans forwarded are returned herewith.

I am, Dear Sirs,

Yours faithfully,

Secretary.

The Surveyors,

WEST HARTLEPOOL.
