

S.S. "SAGAMI" ex "SECUNDUS", No. 82628 in R.B.  
-----

It is submitted in view of the letter received from the Barber Steamship Lines, Ltd., that the Hamburg Surveyors be requested to ascertain from the Builders, Messrs. Blohm & Voss, the facts of the case with regard to the construction of this ship.

She appears from the reports to have been built in 1913, but the Owners now state that according to the records on board the ship she was completed in 1914 when her trial trip took place, and also that there is a plate in the engine room giving the date of build as 1914.
