

Motorship "SAGAMI".

It is submitted the Hamburg Surveyors be informed that the remarks contained in their letter are carefully noted.

The amendments made on the plan approved on the 1st instant were the result of very serious consideration. It is necessary that substantial girders, as previously required, should be fitted in the double bottom under the new longitudinal girders, and further, that the motor seating should have additional transverse strength.

The amendments previously required should, therefore, be carried out, or equivalent arrangements submitted for the consideration of the Committee.
