SURVEY REPORT

I, the Undersigned Surveyor to Lloyd's Agents, Hereby
Certify that all recommendations dated October 11th., 1944, have now
been carried out to my satisfaction.

General Service pump after being assembled was tested
under working condition and found to be in good and efficient order.

Water and cylinders of the ballast pump were opened up
and the port liner found worn 3/64" and the starboard liner 1/32"
the ridges on the liners were ground off and new woodite rings
fitted. Spare woodite rings for both pumps were also made and
supplied.

This vessel's General Service Pump and Ballast Pump
are now in good order and condition, and the vessel's machinery is
eligible in my opinion to remain as now classed in the Register
book without fresh record of Survey.

LOURENÇO MARQUES, THIS EIGHTEENTH DAY OF OCTOBER, 1944.
