

Messrs. Chantiers et Ateliers de St. Nazaire Yard No. T.8.  
-----

IT IS SUBMITTED the Havre Surveyors be informed it is noted the arrangement on board this vessel are such that access may at all times be obtained to the slush wells in the fish holds <sup>TO THE BILGE STRUM IN THE</sup> and forward store.

In these circumstances the proposal to dispense with the sounding pipes to these compartments may be accepted.

It is concluded the fore peak is not intended for water ballast, and accordingly the proposal to lead the air pipe from this compartment to the space underneath the forecastle deck, and not to the open, may be accepted.
