

W248-0148

PAINTING ARRANGEMENT Endorsement.

Shipbuilders: Messrs. *S.S. "Kumanovo"*
 Engineers: Messrs. *New Oil Fuel Tank*
 Owners: Messrs.

Yard No.
 Engine No.

Nº 2504

It is submitted that the plan [^] of
~~Pumping Arrangement~~ *of New Oil Fuel Tank*
 merits approval, provided the arrangements be as
 shown and amended on the plan and the remaining
 requirements of Sections 20 ~~and 21~~ of the Rules (1937-8)
 be complied with so far as they are applicable.

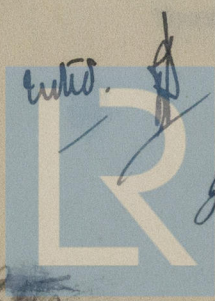

It is not clear from the plan which floors are of watertight construction and accordingly the Surveyor should satisfy himself regarding the drainage of the oil well or wells in way of the tank.

With reference to the alternative design of tank, it should be pointed out that the arrangement shown on Plan Nº 2504 is considered the more desirable both as regards air escape & as regards drainage of the tank top.

Return ² plans Nº 2504

Retain copy.

*Return 3 plans Nº 2515.
