

S.S. "KINGSWOOD".

Plans of cast steel quadrant, tiller and hand gear
ant for new steering gear submitted by the Newcastle Surveyors

It is submitted the Surveyors be informed that the
lings and arrangements of the main tiller and quadrant as
will be approved.

With regard to the plan of quadrant and pinion for the
head hand gear, it should be pointed out that the Rule
eter of the rudder head is 10 inches, and the case is there-
similar to that of Messrs. Short Bros' Yard No. 453, in
rd to which instructions were sent in the Secretary's letter
the 19th instant. The Surveyors should therefore discuss
case also with the Makers.

It might be added that according to the records in this
ice blocks and tackle were originally provided as the second
ns of steering.
