=====

Dear Sirs,
s/s " LEOPOLDVILLE ":

Our plan N^o1894, approved by you:

The steelworks inform us that they are in the impossibility to supply the deep frames as foreseen in our plan. They propose to supply channel bars of 300 m/m. x 100 m/m. x 10 m/m. x 16 m/m. instead of 300 m/m. x 100 m/m. x 11½ m/m. x 17 m/m.

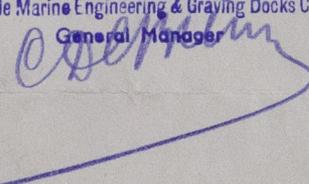

We beg you to let us know by return of post if you can agree to adopt this section.

If not, we are obliged to take much heavier channels, and as the Owner prefers to keep the ship at the forward end as light as possible, we hope that you agree with our proposal.

We remain, Dear Sirs,

Yours faithfully,

Mercantile Marine Engineering & Graving Docks Co S.A.
