Motor Vessel "HENRIK AMELN", Nakskov Skibsvaerft's No. 44

-----

The Oslo Surveyors state that this vessel, which is building by Nakskov Skibsvaerft, would be ready for her trial trip on the 18th instant, and, as the Owners have decided to lay her up after the trial trip, they request that the dates of the Special Surveys might be reckoned from the date when she is placed in commission.

The Society's Rules, page 11, provide :-

"In any case in which a vessel upon completion is not immediately put into commission, but is laid up for a period, the Committee, upon application by the Owner, prior to the vessel's proceeding to sea, may direct an examination of the vessel to be made in dry dock by the Society's Surveyors, and if as the result of such survey the vessel as regards hull, engines, boilers and equipment (including boats) be reported in all respects free from deterioration, the periodical surveys shall become due at periods of 4, 8 and 12 years respectively from the date of such examination."

It is submitted that provided an examination of the vessel be made in dry dock, as stated above, and a satisfactory report be received, the periodical surveys might become due at periods of 4, 8 and 12 years from the date of such examination by the Society's Surveyors.

It is submitted the Oslo Surveyors be informed accordingly, and they be requested to inform this Office when the vessel will be placed in dry dock for examination.

Attached hereto is a memorandum of three cases in which similar action was taken.
