Lloyd's Register of Shipping,

71, Fenchurch Street, E.C.3.

21st September, 1938.

Dear Sirs,

The Wallsend Slipway & Engineering Co.Ltd.  
Engines No.932.  
Messrs.J.L. Thompson & Sons' Yard No.588.

E.

I duly received your letter of the 16th instant, and note your remarks relating to the arrangement of main steam pipes proposed for the above contract.

It is observed that the safety valves on the saturated and superheated steam drums will be set to blow at 450 lb. per sq. inch and 410 lb. per sq. inch, respectively, and this is in order.

Your remarks regarding pipes Nos.1028, 1047-8-9 and 1063 to 1069 are also in order.

I am, Dear Sirs,

Yours faithfully,

Secretary.

The Surveyors,

NEWCASTLE-ON-TYNE.
