E.C.3.

Dear Sirs,

Re Messrs. Joseph L. Thompson & Sons Ltd. -  
No. 588 Ship - m.v. "SILVERLAUREL".  
Electrical Installation.

We understand that it is the wish of the Owners of the above ship to have American type fuses, lampholders, etc. fitted as far as possible to facilitate replacements in American ports. This has been their standard practice for many years and we have followed it out in many previous ships for the Silver Line.

We therefore propose to fit on the Main Switchboard cartridge fuses of the American type and, on Distribution Boards in connection with the 110 volt lighting system, screw plug fuses of the non-renewable standard American pattern. We understand that you are familiar with both of these types but, in view of the special circumstances, would be glad to have your formal approval of their use in the above-mentioned vessel.

Yours faithfully,

p.pro THE SUNDERLAND FORGE & ENGINEERING CO. LTD.,
