

High Close,
Wiltshire Road,
Wokingham, Berks.

16th November, 1939.

Dear Mr. Potts,

I have sent a letter to Dr. Pickworth regarding the relief valve on Pickersgills 243 and expect he will be able to liquidate the matter. The height of 9 feet which I have suggested is 30% of the depth of the tank, so this should not affect the scantlings.

I cannot find any relief valve on the after peak so we need not worry about them.

I return the plans and also enclose a copy of my letter to Dr. Pickworth.

Kindest regards,

Yours sincerely,

E. Brydon

E. Potts, Esq.,
