

of "Wellpark"

This Vessel's machinery has been constructed & fitted on board under Special Survey, & is now satisfactorily reported upon, with the exception, that the tank injection pipe, (which appears to have been too short & has been lengthened by a new end piece with leaded joint,) is objected to by the Owners Superintendent & the Surveyors. The Surveyors recommend that this pipe should be renewed at the Owners' convenience.

It is submitted that
this vessel is eligible for
THE RECORD. + LMC 5.18. subject to a
new tank injection pipe being fitted at the
Owners' convenience.
