Hamburg, 2nd Febr. 1939.

Reference

E

Dear Sir,

With reference to your letter of the 11th ultimo respecting the La Mont exhaust gas fired donkey boiler to be supplied by Messrs. Deutsche Werke Kiel and intended for Messrs. F. Schichau's Yard No.1424, I have to advise you that the contents of your letter were duly communicated to the Boilermakers, who now state in reply that the steam collector is in every respect similar to another one which was approved with your letter E.27.2.36. A copy of the approved plan is sent for reference under separate cover together with two further copies of this plan which Messrs. Deutsche Werke request should be approved with 7 mm thickness of shell and returned to them. The plan approved in 1936 should also be returned after perusal.

*Yd No. 1357
"Tarifa"*

Two further copies of plan MK 111178 are also sent for approval and from these the amended method of welding of the branch for the safety valve on the collector header can be seen.

The Builders state that the steam collector drum will be fitted with a safety valve of 2x50 mm diameter and the collector header with a single one of 45 mm diameter.

A plan showing the arrangement of the units comprising the installation and their connections has been ordered by the Makers from Messrs. Schichau and when received this plan will be submitted in due course.

The Secretary,

LONDON

I am, Dear Sir,
Yours faithfully

J. A. MacKinnon
