

Messrs. F. Schichau's No. 1424.

---

A letter has been received from the Gdynia Surveyor stating that Messrs. F. Schichau G.m.b.H., Danzig, request to be allowed to supply this vessel with three stockless bower anchors which were originally placed on board the motor ship "PAUL HARNEIT" completed by the same Builders at Danzig in July 1936.

It appears that these anchors have been replaced by other types of anchors preferred by the Owners, and the original anchors have been returned to the Builders' Yard.

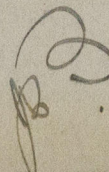

The Owners of No. 1424 have no objection to the anchors being placed on board their vessel, provided new test certificates be issued on which it would not appear that the anchors had been on board another vessel or that they had been used at all.

The Surveyor states that he has examined the anchors and in his opinion they are <sup>in</sup>/suitable condition for being placed on board a new ship.

It is submitted the Gdynia Surveyor be informed that there would be no objection to the anchors in question being supplied to Yard No. 1424, provided the Owners' consent is obtained, but in view of the fact that these anchors have been previously used fresh certificates cannot be issued.

The original certificates should be re-endorsed with the new name in the usual manner.
