

GLASGOW

Glasgow.

29th January 1925.

John Barr.

Messrs. Stewart & Lloyd & Co. attend at their Sellers' works on 24th & 25th Jan. 1925. for the purpose of witnessing tests on 3. Tubes to the order of Messrs. Curle's Shipbuilding & Engineering Co. Ltd. Hull and intended for Main Steam Pipes for their No. 606 as detailed in signed advice notes attached.

The tubes made of Cold Drawn Weldless Steel and plain at ends were tested by hydraulic pressure to $6\frac{1}{2}$ lbs./sq. inch with satisfactory results.

The material has been tested in accordance with the Requirements of the Rules of the Society.

Tubes stamped.

John Barr.
