

MESSRS. HENRY ROBB LTD. YARD NO. 291

ELECTRICAL INSTALLATION

It is submitted the Leith Surveyors be informed that as the 1939/40 Rules for Electrical Equipment do not permit fuses for circuits in excess of 300 amps rating, the current List of Approved Fuses, Circular No.1756 accordingly does not include fuses above this rating. In the case of vessels being built in compliance with the 1938/39 Rules this limit does not generally apply and the Builders' attention should be drawn to Circular No. 1719 and supplement from which a choice of several approved 500 amp fuses may be made.
