

"CAULONIA"

The greater part of the 3rd S.S. No. 1, due 9.40, remains to be held.

Repairs (outstanding since 5.40) are required to 2 wasted deck stringer plates (s.s) in way of cross bunker at the first opportunity.

It would appear that arrangements should ~~now~~ be made, unless the Surveyors consider these plates to be efficient until the expiration of the year of grace, for these plates to be now dealt with or further examined with a view to postponement of the repairs.

Subject to these plates being or being made efficient, no action will be necessary in respect to the overdue Special Survey until 9.41, when a General Examination will be necessary.

It is submitted the Hull Surveyors be informed accordingly and requested for their remarks.
