LLOYD'S REGISTER OF SHIPPING,

Elbing, 9th April, 1938.

Dear Sir,

Re: Machinery Yard No. 1391/1419 at Messrs.
F. Schichau's Works at Elbing.

With reference to your letter of approval dated 4th January 1937 respecting riveted steel air receivers drawing No.M 3651 intended for the above vessel, I beg to report that the riveting of the manhole compensation ring was found not to be in accordance with the alterations made on the approved plan. The 2 rivets in the outer row in way of the long axis have been crossed out for omission on the plan approved, but by an error the rivet holes have been drilled and on 3 rings ready riveted.

I beg to be informed of the decision of the Committee regarding this error.

I am, Dear Sir,

Yours faithfully,

.....

The Secretary,
LONDON.
