

Budleigh

12 Aug 24

Dear Mr Cott.

Ans. 14/8/24.

Thanks for press of

11.4. Re: Aston Your figures seem  
to confirm my impression  
that the B.C. put the thickness  
into the bridge instead of the  
deck fore part of the bridge.  
Col. Dickson thinks the B.C.  
ship well stand the stress  
although it is more than that  
which he considers is safe.  
Presumably on above grounds.

I don't know which of  
the experts is right but our  
ship failed. He can bear  
it now till I return  
Thursday here today with  
showers.

Kindest regards

Yours sincerely  
Herbert Porter
