29th July, 1924.

Dear Colonel Lithgow,

s.s. "CRETASTON"

I was duly favoured with your letter of the 25th instant and your remarks on the question of top deck strengths under various loading conditions have been very carefully noted.

I am also obliged for the blue print of midship section of a vessel passed by the British Corporation, referred to in the last paragraph of your letter, and I need hardly say that the matter will be carefully looked into and I shall have pleasure in writing you further on the subject in due course.

Yours faithfully,

Lieut Colonel James Lithgow, M.C.,

Kingston Shipbuilding Yard,

PORT GLASGOW.
