Secretary.

2nd May, 1924.

Dear Colonel Lithgow,

We are today in receipt of a report from Mr.R.D. Cairns, one of the Society's Ship Surveyors at Glasgow, on the steel screw steamer "GRETASTON", in the survey of which vessel he joined at Hull last week, and in order to pursue the investigation into this case it is necessary, in addition to the information contained in Mr.Cairns' Report, to have transverse sections of the vessel at displacement stations, and also the displacement scale, together with the light weight of the ship; and I have to state that the Chairman would be very much obliged if you would be so good as to kindly arrange for this information to be furnished if possible.

Yours faithfully,

Lieut.Col. James Lithgow, M.C.,  
Kingston Shipbuilding Yard,  
PORT GLASGOW.
