

Messrs. Wm. Denny & Bros., Yard No. 1333.

Electrical Installation.

IT IS SUBMITTED the Glasgow Surveyors be informed it is noted the diagram of connections of the main switchboard shows several instances of two outgoing circuits connected to a common double pole switch. Such an arrangement does not comply with Section 3, Clause 3 (g), of the Rules for Electrical Equipment. In view of the size and nature of the circuits so connected, however, no exception will be taken to such an arrangement in this instance.

The Surveyors should also be requested to furnish information regarding the use of triple pole switches (Nos.18).

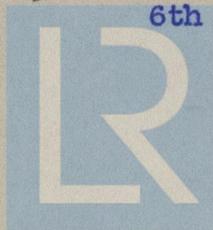

Provided the installation be as shown and amended on the plans and to the Surveyors' satisfaction, and the remaining requirements of the Rules for Electrical Equipment be complied with, the plans merit approval.

Return plans.
