

9.2.26.

S.S. "TAIREA".

Captain Isdale called this afternoon with reference to the points he had raised on the 4th instant as contained in the reports he had received from Bombay, and desired to know whether these points were confirmed or otherwise by Mr. Cheetham.

He was informed that the points (1) to (4) were substantially corroborated, but that point No.(5) which concerned a local leak in the tank top plating in No.1 hold, was considered to be of minor importance.
