

British Diploomat

GLASGOW,

3rd May 1926.

J. D. BOYLE

Messrs. Babcock & Wilcox Ltd., Renfrew, attend at their Works on the 29th March 1926 and subsequent dates, for the purpose of testing and examining one pair of solid drawn superheater headers to the order of Messrs. T. Sugden Ltd., London, and intended for Messrs. John Brown & Co. Ltd's No. 507.

Test pieces were stamped on the headers and the headers were examined under 400 lbs. per square inch hydraulic pressure and found, so far as could be seen, sound and free from defects.

Results of tests: 25.9 tons per square inch and elongation 39 per cent in 4 inches.

For purposes of identification, the headers were stamped:-

26/10482 JDB
