

"STAD ALKMAAR"

This vessel was built at Messrs. Wilton Fijenoord, Rotterdam, under survey of the Rotterdam Surveyors, and the engines built by Messrs. Werkspoor, Amsterdam, under survey of the Amsterdam Surveyors. The freeboard survey was held by the Rotterdam Surveyors, and the freeboard in due course verified and found in order. All necessary testing was completed satisfactorily, as also was the trial, held towards the end of April, 1940, so that in my opinion the vessel may be recommended for the ✚.

The non-arrival of the reports is probably due to delays in the post and the occupation of Holland.

E. R. G.

19th August, 1940.
