

W300-0260

PUMPING ARRANGEMENT Endorsement.Shipbuilders: Messrs. *Cochrane and Sons.*

Yard No. 1210

Engineers: Messrs. *Amos and Smith, Ltd;*

Engine No. 672

Owners: Messrs.

It is submitted that the plan of *Oil Fuel*  
Pumping Arrangement

merits approval, provided the arrangements be as

shown ~~and amended~~ on the plan and the remaining

requirements of Sections <sup>18 of the Rules for Steel Trawlers</sup> ~~20 and 31 of the Rules (19~~

be complied with so far as they are applicable.

The Surveyors should be asked to state whether the valve controlling the steam supply to the fire extinguishing apparatus is in direct communication with the boiler or whether it would also be necessary to open the auxiliary stop valve in order to admit steam to the fire extinguishing line.

If the latter arrangement were adopted it would be necessary to control the auxiliary stop valve as well as the valve for the fire extinguishing apparatus.
