Engineers: Messrs.

No 19787 in R.B.

Engine No.

Main Boilers

It is submitted that the ~~plan of~~ *Genoa Surveyors*
be informed it is noted it is ~~merit approval~~
for proposed to fit to these boilers an
provided arrangement whereby the exhaust gases,
after leaving the smoke tubes, are passed around
a portion of the exterior of the shell in way of the
water space before entering the uptakes.

From a preliminary examination of the plans
it appears that in cases of this type special
attention should be directed to the requirements
of Section 20 D clause 4 and Section 27 clause 3
of the Rules (1937-8) for Steel Ships, whichever
is applicable.

The Surveyors should, therefore, be requested
to discuss the matter with the Firm, and to
forward for consideration detailed plans indicating
the proposals ^{intended} to satisfy the above requirements,
together with plans of the stand pipes and
distance pieces for the boiler mountings.

Return ⁴ plans

Retain ⁴ copies.
