Lloyd's Register of Shipping,

71, Fenchurch Street, E.C.3.

Enclosure.

30th March, 1938.

Dear Sir,

E.

I duly received your letter of the 18th instant, forwarding one received from Messrs. Philip & Son, Ltd., Dartmouth, relating to the loose couplings for the intermediate shafts of their Yard No.847.

It is noted that these couplings have not been made in accordance with the approved plan, and from the sketch now forwarded, showing the amended design, it is considered that with the amount of recessing required for the bolts and nuts the strength of the couplings is considerably reduced. In the circumstances, the Builders should adhere to the scantlings as originally proposed and approved.

The sketch is returned herewith.

I am, Dear Sir,

Yours faithfully,

Mr. T. Miller,  
PLYMOUTH.
