PHILIP & SON, LTD.

Sandquay & Noss  
Engineering Works,  
Dartmouth.

25th March 1938.

Norman Hart, Esq., A.M.I.N.A.,  
15 King Street,  
St. James's,  
London, S.W.1.

Dear Sir,

296:847

In reply to your favour of the 24th instant,  
all the W.Cs. are Blake's Victory pattern, which are of  
the "Below Waterline" type, operated by means of all brass  
plunger pumps. The lead pipe is connected at the top of  
the pump and it is impossible for water to syphon back.

The sinks are specified to discharge through  
the skin.

Yours faithfully,
