

Motor Yacht No. 217 ("AMULREE") building by Messrs. Gebrs.
Niestern for Mr. Peter Crerar.

IT IS FURTHER SUBMITTED the Haren-Groningen
Surveyor be asked to forward to this Office particulars of the
diameter of the propeller (as requested in the Secretary's
letter of the 21st April last. *to Rot. Surveyors*)

It is noted that the intermediate and screw shafts
have been rejected as the tensile strength of the material is
below Rule requirements, and in this connection the Surveyor
should be requested to forward full particulars of the test
results obtained, also to state the actual sizes of these shafts,
in order that the matter may receive further consideration in this Office.

It is also noted that a stern tube having a thickness
of 6mm. has been fitted and this may be accepted in
this instance.

*The Surveyors should be requested
by cable to forward the above
information.*
