A proposal of the Owners to postpone the General Examination and the examination and repairs of the furnaces of the port boiler until the vessel's return to Antwerp about mid-January was approved in November last.

The Owners now write that the vessel has been delayed at her discharge and loading ports and will not return to the Continent before the 10th proximo.

Submitted for the consideration of the Committee.

It is evident from the wastage reported from time to time that this vessel is showing evidence of her age, and in the circumstances it is suggested that Circular No. 1800 should apply in this case.
