27th June 88.

Guantanamo Steam, Market

Re: Pampas & Richards 185th
Built in 1855, the auxiliary engine
Schooner Jack Pampas 235 tons. The
measurement & ascertain the damage
done & how long continued through the
masts falling through whilst launching
in Portsmouth Harbour on the 18th April 88.
No documentary evidence produced.
On the 22nd April 88 the vessel lying
afloat in Portsmouth Harbour on
examination

Found
Main piece of
Rudder fractured
at the deck

Recommended
Main piece to be removed
& vessel placed on a
slipway for examination
of main below water line

The above repairs were recommended to be
placed the vessel in the same position
and taken as she was before the
