

Steel Aux. Ketch Yacht "ELENI" ex "LESMONA V".

The Nantes Surveyors report by cable that they have been requested to survey this yacht with a view to classification: the vessel does not appear to have ever been classed with this Society.

She is fitted with a petrol motor by Gardner of Patricroft, and the hull was built by the Act.Ges.Neptun at Rostock in 1909.

It is submitted the Nantes Surveyor be informed in order that the vessel might be classed in the Society's Yacht Register, it will be necessary for full particulars of her scantlings to be ascertained and for these to be considered by the Committee. If it is possible for plans of the vessel to be obtained showing the original scantlings these could be examined with a view to seeing whether they are suitable for recommendation to the Committee for classification. If this course is not possible then the only course remaining is for the scantlings to be measured from the Yacht, drillings being taken of the shell plating for this purpose.

The survey required would be that of a Special Survey No.3, and the yacht will require to be surveyed in accordance with Section 109 of the Yacht Rules.

If it is desired to also class the Motors of this Yacht, full particulars should be furnished for consideration.
