

S. Y. "MARION".

I telephoned Messrs. R. Ashton & Co. and informed them that according to a report received at this Office from the Society's Surveyors at Southampton on the 30th May, 1929, the main steam pipes were annealed and tested to 340 lbs per square inch pressure, also all plain tubes in the main and donkey boilers were renewed. This work was carried out between the 19th June, 1928, and the 24th May, 1929.
