17th November, 1936.

Dear Sirs,

John I. Thornycroft & Co's Yacht No. 1172.  
-----

E.

I was duly favoured with your letter of the 10th instant respecting the 2 G6Vu33 Type Engines proposed by your goodselves for the above yacht, and have to say it is noted the rating of each engine is now 180 B.H.P. at 380 revolutions per minute, and, in these circumstances, the size of crankshaft, viz:- 130 mm. diameter, previously approved, could be accepted for engines having other particulars as originally submitted.

I am, Dear Sirs,

Yours faithfully,

Secretary.

Messrs. Maschinenfabrik Augsburg-Nurnberg A.G.,  
Werk Augsburg,  
AUGSBURG 2.
