10 NOV 1936

London

Dear Sir,

With reference to your letters of 6th ultimo and 5th inst. regarding shafting for Messrs. Thornycroft's yard no. 1172, I beg to state that Messrs. M.A.N. informed me the other day of their intention to increase at the request of their customers the rating of each main engine for the above vessel from 150 BHP at 325 rpm to 180 BHP at 380 rpm, this being an increase of the mean turning moment of about 6%.

I am, dear Sir,

Yours faithfully

My
Harrow

The Secretary,
L o n d o n.

W319-0048
