22.

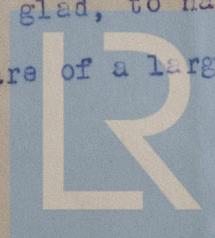

Dear Sirs,

Motor Yacht No. 307.

We have been advised by Messrs. Vickers-Petters, Ltd., of Ipswich, that the port engine of the above vessel will be run this week.

We presume that the Engineers have not overlooked the question of requesting you to have a surveyor in attendance as both the Hull and the Engines have been classed by your Classification Society.

Neither the undersigned nor his principal Mr. C. E. Nicholson will be able to be present, we have, however, sent a representative who will probably be in charge of the machinery when the Yacht is in commission. We should be glad, to have your surveyor's report, as these engines are of a larger B.H.P. than
