

M/V "AQUEITY".  
-----

98687

tee.

it is understood  
This vessel/was built to measurements supplied  
by the Canal Authorities, the measurements being taken  
from stone to stone and no allowance being made for  
the wood fenders.

It is understood that the first lock was successfully  
negotiated only after hacking away the wood fenders, but  
the vessel jammed at the next lock.
