

LLOYD'S REGISTER OF SHIPPING,

17 BATTERY PLACE,

NEW YORK

April 16th, 1923.

RETAIN

Dear Mr. Watt:-

We are forwarding you officially today, final freeboard report 4576, on the s.s. "ALAMEDA".

The total under deck tonnage measured to an imaginary floor line (vessel recently re-measured) is 6482.38. The portion of the boiler and engine room tank above this line is 44.36, making the under deck tonnage 6438.02 as reported by Mr. Narbeth. The official under deck tonnage, however, is 6381.91, which is obtained by deducting the cofferdam from 6438.02.

This vessel being a sister ship to other already dealt with by you, the Philadelphia Surveyors were advised to check the freeboard marks which were already on the vessel, and the reports are all being forwarded today.

With kind regards.

Yours very truly,

W. Bennett

William Watt, Esq.,

London.
