

W349-0041

PUMPING ARRANGEMENT Endorsement.

Shipbuilders: Messrs.

Yard No.

Engineers: Messrs.

S/S "Napier Star"

Engine No.

Owners: Messrs.

No 81719.

*Amended*

It is submitted that the plan of Pumping Arrangement

merits approval, provided the arrangements be as shown and amended on the plan and the remaining requirements of Sections 20 and 34 of the Rules (1933-34) be complied with so far as they are applicable.

*It appears <sup>from the plan</sup> that the bilge ~~main~~ <sup>traps</sup> in No 4 Hold are drained into the cofferdam ports and starboard, and it is concluded that these cofferdams have no communication with the tunnels, but if this is not the case, the open scuttles from No 4 Hold should be fitted with self closing drain cocks.*

Return plans

Retain copy.
