

M.S. "MORVIKEN".

This vessel is building by Messrs. Oresundsvarvet -
Yard No. 49 - and no detail plans of the tanks in question are
available in this Office.

It is therefore submitted a copy of the Owners' letter
be forwarded to the Gothenburg Surveyors, who should be asked
to furnish their remarks.

In the case of the sister vessel, the "DAGMAR SALEN",
the tanks in question are reported on the First Entry Report and
in the Register Book as for vegetable oil, although as far as
can be seen from the plans available it would appear that the
construction and riveting are suitable for fuel oil flash point
above 150° F. The Surveyors might therefore also furnish
their remarks in respect of the tanks in that vessel.

Act. to Owners & ltr. Sept. 1946
