Planter
GLASGOW REPORT No 47211

Port MANCHESTER.

2nd May, 1927.

This is to Certify that

D. C. BUTLER,

the undersigned Surveyor to this Society did at the request of
Messrs. The Superheater Co. Ltd., Manchester,
attend at their Works on the 27th April, 1927, for the purpose
of inspecting 128 STEAM SUPERHEATER ELEMENTS
made to the order of Messrs. David Rowan & Co. Ltd.,
and intended for their Contract No. 855.

The Steam Superheater Elements are composed of solid drawn
steel tubes and are fitted with expanded flanges.
Thirteen elements, representing about 10 % of the
total, were tested in my presence by hydraulic pressure to 1,000
pounds per square inch and were found satisfactory.

The elements are, so far as can be seen, sound and free from
defects, and are suitable for a working pressure of 210 pounds
per square inch.

D.C. Butler

Engineer Surveyor to Lloyd's Register.

FEB:- 12-2-0

MANCHESTER.

This Certificate is issued upon the terms of the Rules and Regulations of the Society, which provide that:—

"While the Committee use their best endeavours to ensure that the functions of the Society are properly executed, it is to be understood that neither the Committee nor the Society are under any circumstances whatever to be held responsible for any inaccuracy in any report or certificate issued by the Society or its Surveyors, or in any entry in the Register Book or other publication of the Society, or for any error of judgment, default, or negligence of the Surveyors, or other Officers or Agents of the Society."

NOTE.—As it is impracticable to mark rivets, bars or tubes of small section for subsequent identification, it must be understood that this certificate does not guarantee the identification of the rivets, bars or tubes received by the consignee or purchaser, with those from which the samples tested were taken.
