Lloyd's Register of British & Foreign Shipping,

71, Fenchurch Street, E.C.

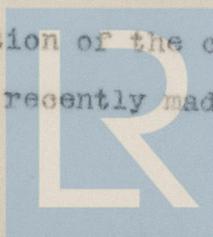

24th December, 1908.

Sir,

With reference to the classification in the Society's Register Book of the steamer "DELFIN", I have to request that as it appears that the vessel is now trading between Cadiz and the Canary Islands, you will be so good as to take the first opportunity to ascertain whether there are any sidelights or scuppers through the vessel's sides below the second deck to affect the position of the load line disc. If so, I shall be glad if you will furnish particulars of the size and position of the same. You should at the same time state the draft at the stem and stern post and the distance of the lowest of the lowest side light or other opening above the water line, as well as the fore and aft position of the openings if any.

You should also ascertain and state the usual draft to which the vessel loads.

The above information is required in order to determine the freeboard which can be assigned and marked on the vessel's sides as a condition of the classification, consequent on the alterations recently made in the vessel at
