LSS Ekna

Report

No.

2114

For the CHIEF SHIP SURVEYOR and CHIEF ENGINEER SURVEYOR.

(In cases which have to be submitted to the Classing Committee "the endorsement to contain a succinct summary of any repairs that have been required and to show the cause or causes of such repairs, and also to bring out clearly any exceptional features in connection with the case, so that the Classing Committee may have all the salient points presented in the endorsement."—Extract from Sub-Committee's Report, 24/5/92.)

Nature of Survey

When due

It is submitted that before this case reaches the consideration of the Committee, the Surveyor should be requested to forward a description of the anchor which he has tested. It should at the same time be pointed out to him that the proof strain applied viz- 37 tons 10 cwt is that required for an anchor weighing 42½ cwt, & ^{in view of this} he should be requested to state whether the weight of anchor given by him is correct.
