

COPY.

Copy of cablegram received from Captain G.A. Neill, Batavia.

Received 7. 6. 33

"CLAN MACNAB". - coupling from main turbine shafting to tunnel shafting cracked longitudinally flange to flange - have called Surveyor.

*The came in port in the morning on 7
the evening I was called on board
the immediate hollow where between
being cracked. The material
subsequent welding was suggested
was on account of the crack
disconnecting the part. The crack
the neck of the small flange
flange just on top of the
the end from a plate,
there are no more case
the crack in the material
General Observations, Opinion, Recommendation
The crack in the main coupling
the removal of the coupling
between turbine and
voyage to Great Britain*
