

Messrs. Bodewes Scheepswerven's Yard No. 309.

It is submitted it be pointed out to the Groningen Surveyors that on the preliminary plan approved on the 18th January last the frames in way of the raised quarter deck were approved 4" x 2½" x .36" bulb angle. When the final plan was submitted these frames were proposed on the midship section 100 x 65 x 8 m/m B.A., and the thickness was amended to be 9 m/m. In the circumstances the action of the Builders in ordering these frames 8½ m/m in thickness is not understood as the Committee's requirement was indicated as 9 m/m.

The Surveyor might discuss the matter with the Builders with a view to having these frames fitted of the correct thickness.

Rtr 5/5 And 8/5
