

REPORT on the

"Empress of Britain".

The moulded depth of this vessel is given as 60'-7³/₄" from top of keel plate. The Builders' base line however is stated to be at the bottom of the keel plate. In view of this unusual circumstance the freeboard should be 29'-0" to correspond to the approved draught of 32'-0" extreme.

It is therefore submitted amended assignment letters be issued in accordance with the "fly" attached to freeboard report.
