

FEE FOR CLASSIFICATION OF THE STEAMER "PRERADOVIC".

5341 tons gross: 535 NHP.

This vessel was built at Vegesack in 1907, and is at present classed with the British Corporation.

She has now been purchased by Messrs. Jugoslovensko-amerikanska Plovidba, who have submitted her for survey for classification with this Society.

Reports on the completion of the survey have now been received, and the vessel has been classed 100A1.

For a vessel of this tonnage and NHP built under Special survey for classification, the Rule fee would be:-

HULL	333:10:0
MACHINERY	101:15:0
	-----
	£435: 5:0
	=====

In the cases of completed new vessels in which classification with Lloyd's Register is desired, it has been the custom to charge 10% of the Rule fee, but in cases of older vessels bearing in mind the Rule fee at the time the vessels were built a special fee has been approved.

In similar cases to this an inclusive fee <sup>(including freeboard)</sup> of £150 to £160 has been charged, and it is submitted that a similar amount might be charged in the present instance.
