

Steamer "CAPRERA"

This vessel stranded off Rio de Janeiro in June 1932 when extensive damage was sustained and although some repairs were carried out to enable her to be taken out of dry dock she was made a CTL and afterwards bought by Mr. Pedro Luiz Correa e Castro of Rio de Janeiro .

A notation of "Stranded 6.32 - Refloated - now in port" was assigned by the Committee in March 1933, but towards the end of last year the vessel was brought to the Repairs Works at Ilha do Vianna for the purpose of reconditioning and reclassification, a request having been received from the nominal owner Snr. Pedro Brando, Manager of the Lloyd Nacional Soc. Anon. which is associated with the Cia Nacional de Navegacao Costeira.

Apparently she has been under survey there ever since and in the attached letter Messrs. Thompson, Graham & Co. Ltd. ask to be supplied with some details as to her present value for insurance purposes.
